**The meeting had the following objectives:**

- Receive an update from the Reference Group summit.
- Overview of NEHTA product development lifecycle.
- Receive an update on the NEHTA Continuity of Care program.
- Presentation on CDA viewer and implications for discharge and referral
- Clinical Leads update.
- Update on developments with Personally Controlled Electronic Healthcare Record.
- Presentation on national progress with ambulance clinical information systems.
- Strategic planning discussion.

**Summary of Actions:**

- Agreed that NEHTA will put together a one-page document on a step by step process for the CCRG on the product development lifecycle.
- Expected date for finalised Discharge Summary release is August 2010.
- Expected that the Specialist letter package will be sent to the CCRG in July 2010 for their review.
- Reported that the Discharge Summary draft package has been reviewed by the NEHTA Clinical Safety unit and the review will be presented at the next CCRG meeting.
