

eHealth: making it happen

Lisa Smith, NEHTA General Manager

Australian Dental Association Inc.

17 November 2010

NEHTA's purpose

Lead the uptake of eHealth systems of national significance; and coordinate the progression and accelerate the adoption of eHealth by delivering urgently needed integration infrastructure and standards for health information

The Tsunami has arrived

Australia's life expectancy is one of the highest in the world, second only to Japan

In 1996, chronic disease accounted for 80 per cent of the burden of disease, measured in terms of loss of years and quality of life

Over three million Australians, or nearly one in seven, suffer from chronic disease

Health expenditure as a proportion of Australian GDP has more than doubled over the last four and a half decades from 3.8% to 9%

Impact on consumers

It is estimated 5,000 Australians die each year due to adverse medical events.¹

Up to one in six (18%) medical errors are due to inadequate patient information.²

Nearly one in three (30%) unplanned hospital admissions in those over 75 years are associated with prescribing errors.³

Impact on healthcare providers

Healthcare providers spend around a quarter of their time collecting information rather than treating patients.⁴

ePrescription systems in Sweden, the US and Denmark increased health provider productivity per prescription by over 50%.⁵

eReferrals in Europe reduced the average time spent on referrals by 97%.⁶

Impact on the economy

From the National eHealth Strategy

eHealth is one of the most important opportunities to:

- Improve the quality and safety of healthcare
- Reduce waste and inefficiency
- Improve continuity and health outcomes for patients

Personally Controlled Electronic Health Record	Clinical Information	Individual Information	Shared Information	[Others]
E-Health Services	Shared Health Profile	Events Summaries	Self Managed Care	Complex Care Management
E-Health Solutions	ePathology	eDischarge	eReferral	eMedications
National Infrastructure Components	Terminology	Secure Messaging	Identifiers	Authentication

Work program highlights

HI Service goes live – 23 million individual healthcare identifiers allocated

First clinical use of AMT now live

NEHTA has a leadership role nationally and internationally
