

# **An update on national eHealth and what it means for older people**

**Jeff Urquart**  
**Clinical Lead**  
**20 April 2011**

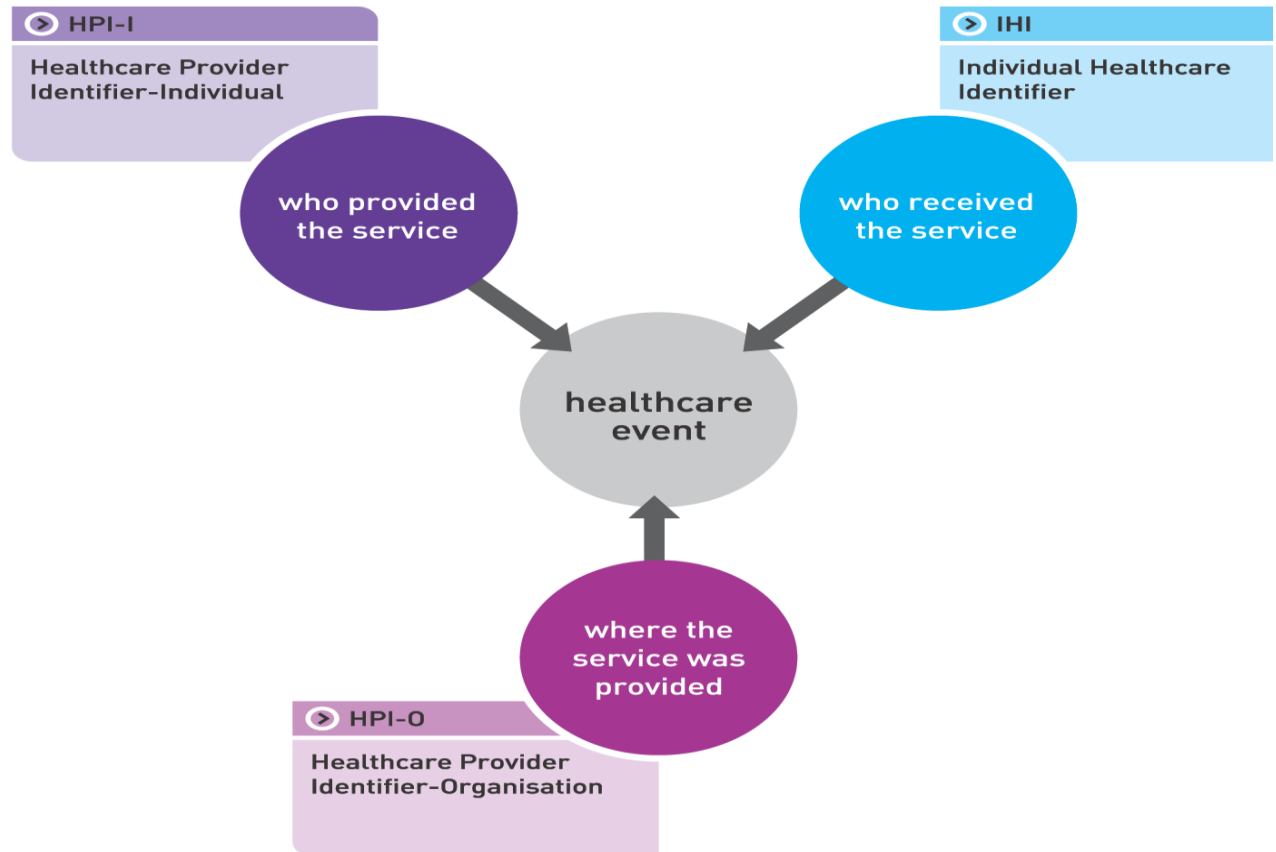

# NEHTA's role

- Increasing involvement in implementation sites
- Managing agent for PCEHR
- Support integration of e-health
- National e-health infrastructure

<b>Personally Controlled Electronic Health Record</b>	Clinical Information	Individual Information	Shared Information	[Others]
<b>E-Health Services</b>	Shared Health Profile	Events Summaries	Self Managed Care	Complex Care Management
<b>E-Health Solutions</b>	ePathology	eDischarge	eReferral	eMedications
<b>National Infrastructure Components</b>	Terminology	Secure Messaging	Identifiers	Authentication

# Healthcare Identifiers

# Identifiers Implementation

Implementation will be a staged approach

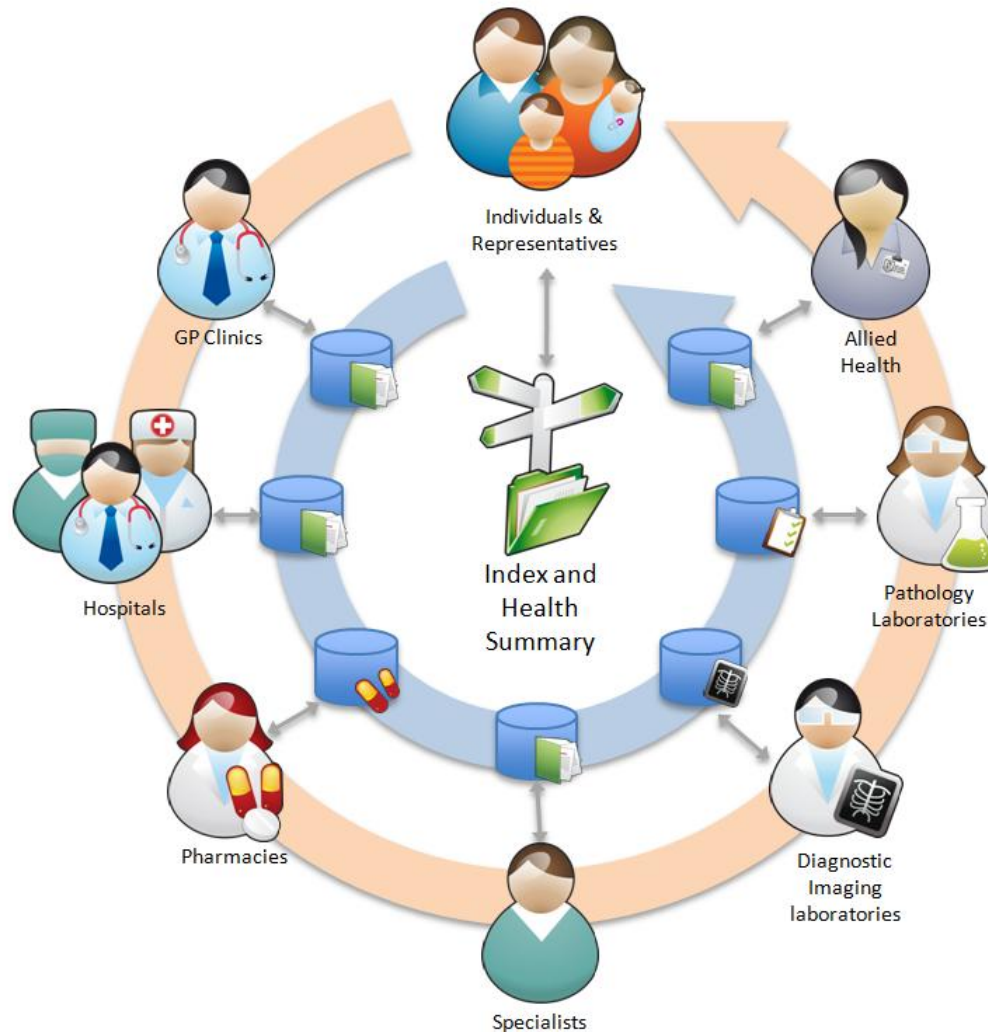

The HI Service is not “big bang” but incremental

Early adopters will work with NEHTA and they select their vendor partners

# eHealth: making it happen

# It's time for a PCEHR

# What the future might look like

eHealth will have penetrated remote areas and taken medical care facilities right to the bedroom of patients

The majority of Australians will take advantage of the benefits of a personally controlled electronic health record

Individuals will be able to obtain and share their personal genome sequence

# Australia's ageing population

# eHealth benefits for Aged Care

Improvements in care

Improvements in efficiency

# Thank you
