

# **Latest news from NEHTA**

**Sue McIndoe**

**NEHTA Clinical Lead**

**9 April 2011**

# NEHTA's purpose

Lead the uptake of eHealth systems of national significance; and coordinate the progression and accelerate the adoption of eHealth by delivering urgently needed integration infrastructure and standards for health information

- Established and funded by the Australian, State and Territory governments

<b>Personally Controlled Electronic Health Record</b>	Clinical Information	Individual Information	Shared Information	[Others]
<b>E-Health Services</b>	Shared Health Profile	Events Summaries	Self Managed Care	Complex Care Management
<b>E-Health Solutions</b>	ePathology	eDischarge	eReferral	eMedications
<b>National Infrastructure Components</b>	Terminology	Secure Messaging	Identifiers	Authentication

# Healthcare Identifiers

# Identifiers Implementation

Implementation will be a staged approach

The HI Service is not “big bang” but incremental

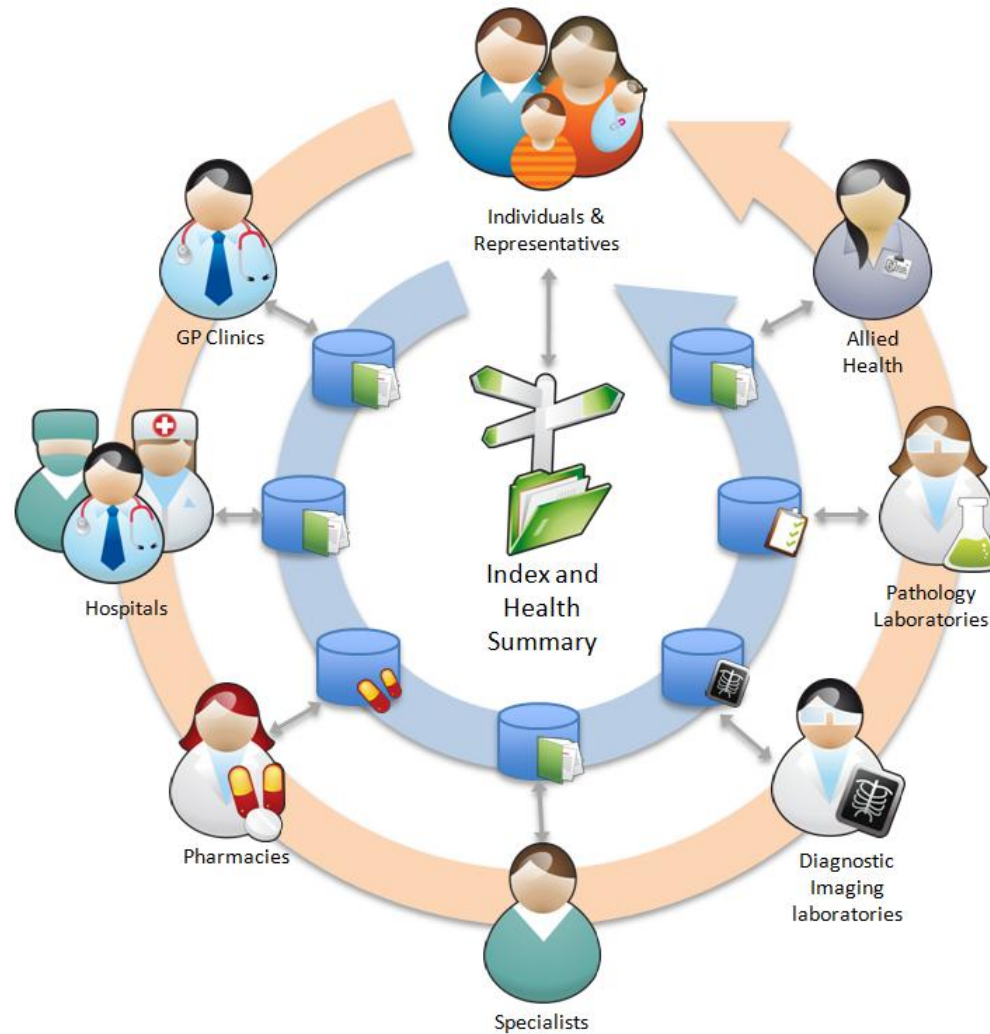

Early adopters will work with NEHTA and they select their vendor partners

# eHealth: making it happen

# It's time for a PCEHR

# eHealth and nursing

- Increasingly health information will be electronic
- Nurses will need skills to access and use this information
- Nurses can help refine and develop eHealth solutions
- Adopt 'eHealth compliant' IT systems (ask NEHTA)

Thank you
