

Healthcare Identifiers and roll out of eHealth in 2012

Sue McIndoe
Clinical Lead
24 June 2011

NEHTA's purpose

Lead the uptake of eHealth systems of national significance; and coordinate the progression and accelerate the adoption of eHealth by delivering urgently needed integration infrastructure and standards for health information

Established and funded by the Australian, State and Territory governments

NEHTA's place in eHealth

- Increasing involvement in implementation sites
- Managing agent for PCEHR
- Support integration of eHealth
- National eHealth infrastructure

Impact on healthcare providers

Up to 18% of medical errors occur as a result of inadequate availability of patient information.¹

Almost two million Australians experience an adverse drug event each year and approximately 138,000 of these end up in hospital.²

53% of medication mistakes are considered 'definitely preventable' and 30% of unplanned hospital admissions in those over 75 years have been associated with medication mistakes.³

Healthcare providers spend around 25% of their time collecting information rather than treating patients.⁴

Personally Controlled Electronic Health Record	Clinical Information	Individual Information	Shared Information	[Others]
E-Health Services	Shared Health Profile	Events Summaries	Self Managed Care	Complex Care Management
E-Health Solutions	ePathology	eDischarge	eReferral	eMedications
National Infrastructure Components	Terminology	Secure Messaging	Identifiers	Authentication

Healthcare Identifiers

Identifiers Implementation

A staged approach

The HI Service is not “big bang” but incremental

Early adopters will work with NEHTA and they select their vendor partners

eHealth: making it happen

Benefits

Better healthcare quality and safety – through better coordinated and more timely healthcare

Better use of time – spending less time searching for patient information

Better information sharing between providers – leading to improve decision support

Better quality information – less reliance on the individual to recall the details of their healthcare history

Benefits (cont'd)

Better coordination of care – more effective shared care or supported self managed care means better management of chronic disease and complex health problems

Better use of treatment plans – through improved compliance

Better performance of healthcare providers – through availability of benchmarking data

Better support for clinical trials – leading to more effective healthcare treatments

What do I need to do?

Gain an understanding of the intent and scope of the PCEHR

Start considering what it will mean for your organisation and patient care

Discuss with your colleagues

Get involved and participate in the Public Consultation process

Keeping up with the PCEHR program news
