

Building a case for CHANGE – PCEHR

Peter Fleming, NEHTA CEO

AGPN eHealth Conference 1 to 2 August 2011

The facts speak for themselves

Australia's life expectancy is one of the highest in the world, second only to Japan

In 1996, chronic disease accounted for 80 per cent of the burden of disease, measured in terms of loss of years and quality of life

Over three million Australians, or nearly one in seven, suffer from chronic disease

Health expenditure as a proportion of Australian GDP has more than doubled over the last four and a half decades from 3.8% to 9%

Impact on consumers

It is estimated 5,000 Australians die each year due to adverse medical events.¹

Up to one in six (18%) medical errors are due to inadequate patient information.²

Nearly one in three (30%) unplanned hospital admissions in those over 75 years are associated with prescribing errors.³

3 Chan. M, 2001, Internal Medicine Journal, Adverse drug events as a cause of hospital admission in the elderly; 31: 199-205

Impact on clinicians

Clinicians spend around a quarter of their time collecting information rather than treating patients.⁴

ePrescription systems in Sweden, the US and Denmark increased health provider productivity per prescription by over 50%.⁵

eReferrals in Europe reduced the average time spent on referrals by 97%.⁶

Impact on the economy

Personally Controlled Electronic Health Record	Clinical Information	Individual Information	Shared Information	[Others]
E-Health Services	Shared Health Profile	Events Summaries	Self Managed Care	Complex Care Management
E-Health Solutions	ePathology	eDischarge	eReferral	eMedications
National Infrastructure Components	Terminology	Secure Messaging	Identifiers	Authentication

Vision for the PCEHR

- The national PCEHR system aims to place the individual at the centre of their own healthcare
- Individuals will be able to choose whether or not to have a PCEHR
- Individuals will have greater involvement in their care

What is the PCEHR?

PCEHR program partners

- Change and Adoption Partner
- Benefits Evaluation Partner
- National Infrastructure Partner

Where does the Network fit?

- AGPN is a member of the Change and Adoption partner consortium.
- You have an important role to play in the delivery of the PCEHR change and adoption strategy.

Thank you
