If you are unable to attend the live event, the link to listen back will be posted on the NEHTA website. Alternatively, please contact Alexis.Mann@nehta.gov.au who can send you the link.

Development through Tiger Teams

- These specifications have been developed with input from 'tiger teams' or small working groups consisting of subject matter experts, clinical representatives and IT-014 members in each of the areas of specification development. We appreciate the time and effort many of our stakeholders have put into the development of these specifications and look forward to working with the community further in 2012.
